

EB-TRACE F-10

0406

F-10 is a self-limiting parallel heating cable. The F-10 is typically used for protection for frost of roofs and gutters.

Construction of the cable

Specifics of EB-TRACE F-10

Basic type according to:	85 CM as per SS 4242411
Tested and approved by:	SEMKO 9834199/01-03
Max permissible use temperature:	65°C Powered
Minimum use temperature:	-30°C
Voltage:	220-240 Volt
Minimum bending radius:	35 mm (radius to the inside of the tape)
Dimensions:	7,3 x 5,3 mm
Rated output:	10 W/m at 5°C

Maximum installation length outside pipe	100 metre - (max 10 A)
Maximum installation length inside pipe	60 metre - (max 10 A)
